

ABSTRACT

It is intended to provide novel compositions usable in improving the flavor of an alcoholic beverage made from grapes typified by wine. Namely, a composition usable in
5 improving the flavor of an alcoholic beverage made from grapes which contains the culture
of a strain belonging to a genus *Aspergillus*, *Penicillium*, *Rhizopus*, *Rhizomucor*,
Talaromyces, *Mortierella*, *Cryptococcus*, *Microbacterium*, *Corynebacterium* or *Actinoplanes*
and being capable of producing diglycosidase.
